Engine to be used:

Mileage:

1. Describe what the vehicle is to be used for, such as daily driver, drag racing, road course racing, endurance racing, track only, etc.
2. What are your horsepower goals?
3. Describe what you would like us to do to your engine.
4. What parts would you like replaced or modified?
5. Are you using power adders such as turbo, supercharger, nitrous? Also include if engine originally had a power adder installed.

6. Has the engine failed or worn out? If yes explain what happened.

7. Is this engine a number matching engine for a rare or limited production car? Do you want a factory look to your engine?

8. Do you have a complete core?

9. Is this your only car?

10. What time frame are you expecting?

11. Are we going to install all the accessories on the engine, such as manifolds, turbo, alternator, etc?

12. Are you initially interested in a shortblock or longblock engine?

13. Are we going to port the heads?

14. What cams are you planning on running?

15. What exhaust are you planning on running?

16. If applicable, which intercooler are you planning to run?

17. Do you want to run pump gas and/or race fuel?

18. If applicable what electronics or tuning equipment are you running?

19. Are going to provide all the parts or are we using your parts?

20. How far are you into the research of your project?

21. Have you spoken to other engine builders? If yes, who?

22. What is your budget? Example: I just inherited \$100 million from my great uncle and money is no object or perhaps I have a limited budget and want a quick durable car. Please include the actual amount of money you were planning on spending

Please fill out and email or fax back to us so we may build you the exact engine your looking for. You can copy and paste in email
